-Restore plc press release-

## **Restore launches new ESG strategy and commitment to be NetZero by 2035.**

Restore plc launched its Group ESG strategy, 'Restoring our World' at its capital markets day on 11 November 2021, with a key commitment to be Net Zero by 2035. The strategy is a culmination of activity, including research and input from internal and external stakeholders, as well as specialist advisors.

The strategy is underpinned by three strategic pillars with actions and measurable KPIs:

- **Our planet**

Restore is committed to lightening its footprint on the planet. It produces carbon through the use of electricity in its operations and through the fleet that it operates and creates waste in consumption of plastics and cardboard. There are ambitious targets to improve in all areas.

- **Our people**

Restore is a business driven by its purpose, to provide data and information security in a safe and sustainable environment. With a strong regional business in the UK, Restore is committed to improving social and community contributions, and diversity and equality in all forms across the workplace.

- **Our business**

Restore are committed to improving on already high levels of governance. Restore already support organisations in reducing their Scope 3 emissions and aid delivery of ESG strategies. However, Restore will develop further capability, and invest in new services to increase this positive contribution further.

### **Key commitment: Net zero by 2035**

Restore has made a commitment to accelerate its journey to net zero carbon emissions, in line with the objectives set out in the 2015 Paris Accord and the Group has stated its goal to become a Net Zero organisation by 2035.

“Restore is a recognised leader in its markets and communities”, comment Charles Bligh, CEO Restore, “And whilst the Board is committed to ensuring the business continues to grow, it is equally committed to ensuring this is achieved in the right way. We are therefore delighted to launch the Group’s ESG strategy, ‘Restoring our World’ which sets a new bold and ambitious path for the business to improve our ESG commitments”.

-ENDS-

### **Note to editors**

The full strategy: Restoring our World can be found on the Restore plc investor website:
